

Does your budget add up?

In the design industry there are small, medium and large companies – their fees often reflect that of their overheads and level of expertise. There are plenty of freelance graphic designers and other design companies who will charge anything upwards of £20 per hour for their services

Fact

It may take those same freelance designers and design companies ten times as long to produce design work than it does with Clear Creative.

$$10 \times 20 = 200$$

Clear Creative will be able to do it in a 10th of the time at half the cost.

$$1 \times 95 = 95$$

The larger companies will charge around upwards of £180 per hour for design and pass your work onto a junior or freelance designer. You then spend more time trying to get them to understand what you want.

$$180 \times 2 = 360$$

Clear Creative believe in a fair price for design work that will exceed your expectations. We have no hidden agenda and won't charge you like a raging bull!

We believe in quoting you upfront and listing the scope and dependencies of your project. You can then make an informed decision as to what you can and cannot budget for.

Flexibility

At Clear Creative we know our clients have budget parameters, that's why we employ a tiered cost matrix to reflect given budgets. We are flexible enough to listen to our customers who might only have £10 today but a £100 tomorrow.

Want a quotation or see if we can do a particular job for a fixed price?
